PROFESSIONAL SUMMARY

Fourth-year Computer Science student with practical full-stack project experience using React, TypeScript, Python, Flask, SQLAlchemy, and PostgreSQL. Develops features across frontend, API, and database layers, integrates authentication and permissions, and tests end-to-end workflows.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Vite
Backend: Python, Flask, REST APIs, SQLAlchemy, ReportLab
Data: PostgreSQL, SQL, database design, Supabase Storage
Engineering: Git, GitHub, Turborepo, Docker, JWT, authentication, authorization, RBAC, API integration

SELECTED PROJECT

MunLink | Developer / Maintainer | Personal Project

React, TypeScript, Tailwind CSS, Python, Flask, SQLAlchemy, PostgreSQL, Supabase Storage, JWT, ReportLab, Turborepo, Docker
Live demo: <https://munlink-web-9s3r.onrender.com/>

- Handled development in a three-person CSE 2 team during my third year, with teammates testing and debugging; continued maintaining and expanding the project after the course.
- Used AI tools, documentation, and community resources to support implementation and testing, practicing detailed prompting, task decomposition, context management, output validation, and token-conscious workflows.
- Built resident and administrative React applications using a shared Flask REST API and PostgreSQL database. The demo is scoped to Zambales and is not an official LGU deployment.
- Modeled end-to-end workflows for document requests, review, payments, QR-verified PDF release, program applications, announcements, issue reports, notifications, and marketplace transactions.
- Implemented JWT access and refresh tokens, password hashing, role- and location-scoped authorization, audit logging, sensitive-file access controls, and rate-limiting fundamentals.

EXPERIENCE

IT Support Assistant - Cisco Department | June 4-July 31, 2025 (20 days)

Special Program for Employment of Students (DOLE) | Northern Zambales College, Inc. | Masinloc, Zambales

- Encoded and validated student information to support accurate identification-card processing and confirm information consistency before printing.
- Captured and prepared student photographs, organized records, and supported the end-to-end workflow from data preparation through card production.
- Performed final quality checks and assisted with the organized release and distribution of completed student IDs.

EDUCATION

Bachelor of Science in Computer Science | 2023 - 2027

President Ramon Magsaysay State University | Fourth-year student

CREDENTIALS

- Data Analytics Essentials - Cisco Networking Academy, Aug 2026
- Azure AI Fundamentals - TESDA course completion, Jul 2026
- Security, Compliance, and Identity Fundamentals - TESDA course completion, Jul 2026
- Developing Designs for User Experience - TESDA course completion, Jul 2026
